

MENINGITIS VACCINE SCHEDULE FOR TEENS

Two vaccines. Two doses of ACWY. Protection for life.

Teens need both types of meningitis vaccines:

ACWY

Protects against serogroups
A, C, W, and Y

MenB

Protects against serogroup B.
Make sure you get MenB too!

11-13 YEARS

ACWY: First dose of the series

Start the series early to build strong protection.

16-18 YEARS

ACWY: Booster dose

Booster is needed for continued protection during late teens and young adulthood.

ALL TEENS

MenB: Complete the series

MenB is strongly recommended for teens. Ask your healthcare provider which option is right for you.

MENB VACCINE OPTIONS

2-DOSE SERIES (Bexsero®)

- 0 and 1 month
- At least 1 month between doses.

OR

3-DOSE SERIES (Trumenba®)

- 0, 1-2, and 6 months
- Second dose at least 1 month after the first.

Check with your healthcare provider or local health department about availability and the best option for you.

PROTECTION TODAY. PEACE OF MIND TOMORROW.

Staying on schedule helps protect you during the years you're most at risk.

Talk to your healthcare provider to make sure you and your teen are fully protected.
